### SUMMARY

*"My goal is to make beautiful and meaningful art for people of all ages and cultures."*

The basic ideas behind my work are simplicity, zen, universal beauty, timelessness, and meaning.

Love for art and beauty is what inspires me to create.

I love to study art history, world religion, sacred geometry, and ancient cosmology. Love of nature is also reflected in my art.

My favorite conversations simultaneously explore our past and our future. This timelessness is the essence of my artistic explorations.

I am classically trained in perspective, anatomy, composition, color theory, design, and most importantly art history. This is the foundation of my principles and beliefs, and these things form the essence of my vision.

My artwork is not about me. I aim to make art for all people and this universality is deeply reflected in my paintings.

I engage with many mediums but acrylic paintings I have found to be most effective and thus is my primary medium.

Elijah Thane
